

# Transform End-to-End User and IT Experiences

Automate network operations with ePlus and Juniper Mist.

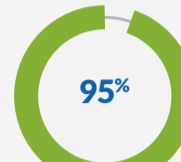

Digital transformation and customer experience drive today's modern enterprise.

70% of companies either have a digital transformation strategy in place or are working on one.<sup>1</sup>

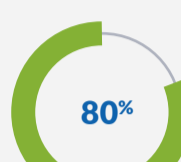

44% of companies have already started a digital-first approach to operations and customer engagement.<sup>1</sup>

95% of organizations will still not know the connectivity requirements of all the IoT devices accessing their applications by 2022.<sup>2</sup>

30% of large enterprises will exclusively use artificial intelligence for IT operations and digital experience monitoring tools to monitor modern applications and infrastructure by 2023.<sup>2</sup>

80% of businesses experience network errors caused by human mistakes on a regular basis.<sup>3</sup>

Move faster, transform smarter: Top business drivers for network automation.

1

## Operational efficiency

Organizations need to simplify network operations and make greater use of network resources.<sup>4</sup>

2

## Service assurance

As devices, applications, and services become more portable, customer experience becomes a key factor to accelerating digital transformation.<sup>4</sup>

3

## Service delivery efficiency

Reliable and intelligent service delivery reduces costs and contributes to an improved user experience.<sup>4</sup>

4

## Agility

Networks must be flexible, scalable, and interoperable to support the applications enabling transformation.<sup>4</sup>

## Juniper Mist: Revolutionizing networking with end-to-end AI-driven automation.

### Transform IT with AI-driven operations and support.

Simplify network operations, automate support, and proactively resolve issues.

### Deliver exceptional user and device experiences.

AI-driven insights and customizable service level expectations (SLEs) ensure the best user, device, and IoT experiences.

### Defy infrastructure limitations with a microservices cloud.

Build a scalable, agile, and reliable solution with a cloud-first microservices architecture.

### Enable optimized experiences.

Deliver innovative and strategic projects with IoT and location services.

### Evolve as your business evolves.

Natively integrated AI and data science tools meet rapidly changing requirements.

ePlus completes the solution with integration, services, and support.

#### Professional services

Realize impact and fast ROI from your IT investments.

#### Managed services

Move from managing IT to managing business outcomes.

#### Strategic technology staffing

Get the skills and people you need when you need them.

#### Support services

Fulfill your global IT service needs quickly.

Let's enable your intelligent network together.

Working together, ePlus and Juniper Mist engineer innovative solutions for your most challenging wired and wireless network needs. We remove traditional constraints and enable you to deliver automated, secure, and scalable networks that connect you with the world.

Connect with ePlus to discuss your wired and wireless network challenges and how we can help.
