

{ Device Management }

Problem: You've found the best tools to run your devices and servers. But you may not have the time, expertise and resources to manage these tools effectively. So how do you protect your environment against imminent threats and ensure consistent standards throughout your organization without diverting resources from your core business activities?

IGX HAS A SOLUTION

Our Device Management service is designed to help organizations of all sizes optimize their investment in security technology. Our skilled experts will take over the day-to-day management of your devices, including version tracking, security patch updates and functionality updates.

We pay attention to the details of device management to help you reduce risk and avoid costly and time-consuming disruptions to your business. igxglobal has a staff of skilled security experts who keep abreast of best practices, updates and threats, and implement the measures needed to safeguard your devices effectively and efficiently.

THE LATEST VERSION OF SECURITY SOFTWARE

igxglobal security experts keep up-to-date on the latest software updates and changes to code. We will provide you with automatic implementation of upgrades as they become available. Our service identifies new threats on a daily basis, so your environment will be protected against known attacks as well as new vulnerabilities as they are identified.

CONSISTENT STANDARDS THROUGHOUT

igxglobal recommends software standards based on what we believe offers the highest reliability, availability and performance for our clients. Additionally, we will work to ensure consistent standards throughout departments in order to prevent conflicts and outages.

AUTOMATIC IMPLEMENTATION OF SECURITY PATCHES

We provide automatic implementation of security patches on a weekly basis (or according to your preferred schedule). Additionally, we will implement functionality changes at your request.

UNLIMITED CHANGE MANAGEMENT SERVICES

igxglobal provides unlimited change management services, including a request for policy changes, on a scheduled or ad hoc basis according to your business needs.

WE HELP YOU SIMPLIFY SECURITY

igxglobal will help you simplify security. We take the time to understand your business and your security requirements. Then we provide solutions that meet your day-to-day needs while also creating a state of sustained predictability. Device Management is part of a broad range of solutions offered by igxglobal that includes Security Operations Services, Threat Mitigation, Security Products and Professional Integration.
