Look beyond what's practical to achieve what's possible.

At IGXGlobal, we believe that the future belongs to those who look beyond what's practical to achieve what's possible. We specialise in helping our customer organisations explore the "what ifs" — and to experience more than they could have envisioned on their own. With IGXGlobal, they can experience the unexpected.

Our top priority is always to make sure that the services and solutions we offer are aligned with what our customers need to succeed. And, as our customers' technology needs, resource constraints and talent needs grow fast and furious, so too does the level of expertise IGXGlobal brings to the table, along with a customised set of services and solutions developed just for them.

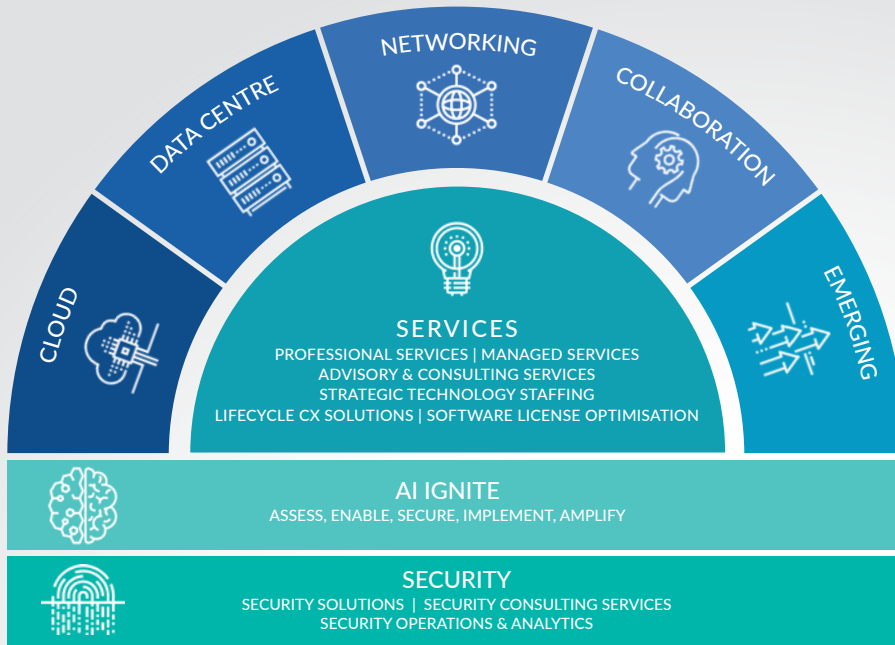

Why IGXGlobal

IGXGlobal, an ePlus subsidiary since 2015, moves beyond merely implementing IT solutions to harnessing technology and driving transformation. We help accelerate and reignite growth, enabling organisations to stay ahead of change, unlock new opportunities, accelerate progress, and achieve more than they ever imagined. Our offerings are comprised of a large portfolio of possibilities — spanning the technology lifecycle — developed to help position customer organisations to tap into unimagined opportunity and potential.

Behind every solution, every service, and every success story is a team of exceptional people — skilled, dedicated, and relentlessly driven to deliver extraordinary results. Some services are delivered by great technology. Some services are delivered by great people. By working with IGXGlobal, customers get the best of both worlds.

Comprehensive Set of Solutions & Services

ARTIFICIAL INTELLIGENCE – Assess AI readiness, define use cases, decide to build or consume, help ensure a successful proof of concept, design, implement or manage an AI project.

CLOUD – Modernise your infrastructure, extend capabilities to cloud, accelerate migrations or optimise cloud platforms (and spend).

SECURITY – Ensure reliable, full coverage by design, from core to edge, with solutions, tools, intelligence and managed services that diagnose, predict, map, and protect your environment.

DATA CENTRE and NETWORKING – Modernise your data centre or storage, design and deploy next-gen enterprise and service provider networks to ensure that all domains are supported with high-performing, fault-tolerant, secure, intelligent and application-aware solutions.

COLLABORATION – Accelerate workplace/workspace transformation, enhance employee and customer experiences and ensure secure interactions with predictable cost models.

SERVICES – Maximise return on IT investments, facilitate implementations and enhance technology performance with consultative, advisory and managed services.

At IGXGlobal, we don't just keep pace with change – we accelerate your progress by introducing you to “what's possible” to create ongoing competitive advantage and market leadership for your organisation. We invite organisations of every kind to embark with us on the journey to possible, and to see for themselves what it really means to Experience the Unexpected.
